- Marvin E. Collins testifies as follows:
- 4 Mr. Collins first identifies the recommendations and adjustments proposed by Arizona Corporation Commission Staff ("Staff") that are acceptable to Sunrise Water Co. ("Sunrise").
 - He then explains why it is appropriate to normalize hydrant sales as proposed by Sunrise. Testyear sales were inflated for three reasons:
 - 1. Constructions activity and resulting hydrant-water sales peaked in 2006, began to decline in 2007, and has now declined well below 2003 levels;
 - 2. More than one-half of 2007 hydrant water sales were to support a regional flood control project, which is now complete; and
 - 3. Most of 2008 hydrant-water sales were for the flood control project and for Phase I of the Happy Valley Road expansion, which is also now complete.
 - He then provides a discussion of the services provided to Sunrise by SRW Consulting and explain why they provide benefit to ratepayers and should be included in Sunrise's expenses.
 - He next explains why Sunrise's rent expense should include costs incurred to lease workshop, storage, and field office space. The Well No. 7 site could not be used without significant, expensive construction and a zoning variance. Other existing office space is not adequate.
 - Finally, he responds to Staff's testimony position to not include test year income tax expense for Sunrise. Failure to include these legitimate expenses would financially harm Sunrise and affect Sunrise's ability to fund future infrastructure projects.

|--------------|---|
| I | INTRODUCTION |
| Q. | PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND TELEPHONE |
| | NUMBER. |
| A. | My name is Marvin E. Collins. My business address is 9098 W. Pinnacle Peak Rd., |
| | Peoria, Arizona 85383, and my business phone is (623) 972-6133. |
| Q. | ARE YOU THE SAME MARVIN E. COLLINS WHO PREVIOUSLY |
| | SUBMITTED DIRECT TESTIMONY IN THIS DOCKET? |
| A. | Yes. |
| II | PURPOSE OF TESTIMONY |
| Q. | WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY? |
| A. | In my testimony: |
| | • I identify the recommendations and adjustments proposed by Arizona Corporation |
| | Commission Staff ("Staff") that are acceptable to Sunrise Water Co. ("Sunrise"). |
| | • I explain why it is appropriate to normalize hydrant sales as proposed by Sunrise. |
| | • I provide a discussion of the services provided to Sunrise by Mr. Rip Wilson and |
| | explain why they provide benefit to ratepayers and should be included in Sunrise's |
| | expenses. |
| | • I explain why Sunrise's rent expense should include costs incurred to lease workshop. |
| | storage, and field office space. |

• Finally, I respond to Staff's testimony position to not include test year income tax

expense for Sunrise.

Ш 1 STAFF ADJUSTMENTS HAVE YOU REVIEWED STAFF'S DIRECT TESTIMONY IN THIS CASE? 2 Q. 3 A. Yes, I reviewed the testimony provided by Mr. Alexander Igwe and Mr. Jian Liu. IS SUNRISE WILLING TO ACCEPT THE RECOMMENDATIONS MADE BY 4 Q. 5 STAFF? A. Sunrise believes that Staff has completed a thorough review of Sunrise's filing and has 6 7 evenhandedly evaluated Sunrise's plant records, test year income, and test year expenses 8 and made many sound recommendations that are acceptable to Sunrise. I will discuss 9 each of them in turn. DO YOU ACCEPT STAFF'S COST OF CAPITAL RECOMENDATION? 10 Q. A. Yes, Staff has recommended adoption of Sunrise's proposed 10 percent Fair Value Rate 11 12 of Return. Q. WHICH OF STAFF'S RATE BASE ADJUSTMENTS DOES SUNRISE ACCEPT? 13 14 A. Sunrise accepts Staff Rate Base Adjustment No. 1, which increases accumulated depreciation by \$135,964 over Sunrise's proposal of \$2,492,247. 15 WHICH OF STAFF'S OPERATING INCOME ADJUSTMENTS DOES SUNRISE 0. 16 17 ACCEPT? 18 A. Sunrise accepts the following Operating Income Adjustments: 19 Operating Income Adjustment No. Adjustment Amount 20 Expense Category 23 21 Salaries and Wages (\$68,913)22 Salaries and Wages \$4,243 5 23 Office Supplies Expense (\$1,500)24 7 Water Testing Expense \$2,184 25 10 Rent Expense \$1,500 Rent Expense \$19,521 26 11 27 12 Transportation Expense (\$3,508)28 Transportation Expense (\$8,485)13

Transportation Expense

(\$6,300)

| 7 | | Total accepted Operating Income Adjustments (\$16,225) | | | | |
| 8 | IV | HYDRANT WATER SALES | | | | |
| 9 | Q. | WHAT IS STAFF'S RECOMMENDATION REGARDING SUNRISE'S | | | | |
| 10 | | PROPOSAL TO NORMALIZE HYDRANT WATER SALES REVENUE? | | | | |
| 11 | A. | Staff has recommended denial of Sunrise's proposal to normalize hydrant water sales, | | | | |
| 12 | | which has the effect of increasing test year revenue by \$47,815. | | | | |
| 13 | Q. | PLEASE SUMMARIZE STAFF'S ASSESMENT OF SUNRISE'S PROPOSED | | | | |
| 14 | | METHOD FOR CALCULATING NORMALIZED HYDRANT WATER SALES? | | | | |
| 15 | A. | Staff states that Sunrise's method for calculating normalized hydrant water sales is | | | | |
| 16 | | flawed. Specifically Staff relies on two reasons for rejecting Sunrise's method: | | | | |
| 17 | | • The five year average includes three years of very low water sales which results in | | | | |
| 18 | | understatement of normalized hydrant water sales. | | | | |
| 19 | | • Sunrise understates its normalized level of test year hydrant water sales by deducting | | | | |
| 20 | | the hydrant water sales to the Maricopa County Flood Control District. | | | | |
| 21 | Q. | DO YOU AGREE WITH STAFF'S ASSESMENT? | | | | |
| 22 | A. | No I do not. | | | | |
| 23 | Q. | PLEASE DESCRIBE THE FLOOD CONTROL PROJECT. | | | | |
| 24 | A. | The Flood Control Project is the 83rd Avenue / Pinnacle Peak Road Drainage | | | | |
| 25 | | Improvement Project constructed by the Maricopa County Flood Control District, in | | | | |
| 26 | | cooperation with the City of Peoria and Maricopa County Department of Transportation. | | | | |
| | | | | | | |

The project was designed to provide 100-year protection to the area between Calle Lejos and Deer Valley Roads, and approximately 87th to 83rd Avenues and 10-year protection between 87th and 91st Avenues. The project included several components:

- Construction of two detention basins (the Pinnacle Peak Basin at the northwest corner of 83rd Avenue and Pinnacle Peak Road, and the Avenida del Sol Basin at the southeast corner of Avenida del Sol and 87th Avenue):
- Construction of a 100-year storm drain along Calle Lejos, 87th Avenue, 83rd Avenue,
 and Pinnacle Peak Road; and
- Construction of a 10-year storm drain along Cielo Grande, Avenida del Sol and Pinnacle Peak Rd.

Attached as Exhibit MEC-R1 is a Project Design Bulletin issued by the Flood Control District, which describes the project in greater detail.

Q. IS THE FLOOD CONTROL PROJECT REPRESENTATIVE OF NORMAL CONSTRUCTION WITHIN SUNRISE'S SERVICE AREA?

No. This project was an extremely large regional project and not representative of normal construction within Sunrise's service area. As indicated on the Project Design Bulletin (MEC-1), the project spanned across a full square mile of land within the Sunrise service area and included the excavation of two massive retention basins, the installation of several miles of storm drain piping, and associated repaving of numerous streets.

Q. WHAT IS THE CURRENT STATUS OF THE FLOOD CONTROL PROJECT AND SUNRISE'S HYDRANT WATER SALES FOR THE FLOOD CONTROL PROJECT?

A. By year end 2008, the project was fully complete, the hydrant water account with the contractor was closed, the hydrant meter had been removed, and all hydrant water sales had ceased.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 5 of 19

Q. PLEASE DESCRIBE THE HAPPY VALLEY PROJECT?

A. This project provides a vital east-west link for northern Peoria by constructing the missing segment of Happy Valley Road over New River between 91st Avenue and Terramar Boulevard. This new link to Peoria's street network provides additional options for traffic now using Lake Pleasant Parkway, 83rd Avenue, 67th Avenue, and Deer Valley Road. The improvements include three lanes in each direction plus bike lanes, street lighting, landscaping, drainage, and a 16-inch waterline. Attached as Exhibit MEC-R2 is a City of Peoria presentation from a December 17, 2008, Stakeholder Meeting describing the project in detail.

Q. WHAT IS THE CURRENT STATUS OF THE HAPPY VALLEY PROJECT?

A. Construction of Phase I began on January 15, 2008. The City of Peoria held a Grand Opening Celebration for the completion of Phase I of this project on December 20, 2008. The event celebrated the opening of Happy Valley Road from 67th Avenue to 83rd Avenue.

The contractor has now moved to Phase II of the project. Phase II will construct Happy Valley Road from 83rd Avenue to a point just east of Lake Pleasant Parkway. This phase includes earthwork, asphalt paving (rubberized), storm drainage, waterline, sewer line, screen walls, curb/gutter, sidewalks, bike lanes, signals, landscaping, etc. This work will continue into the winter of 2009.

Q. WHAT IS THE STATUS OF SUNRISE'S HYDRANT WATER SALES FOR THE HAPPY VALLEY PROJECT?

A. As indicated above, Phase I of the project was completed in December of 2008. By year end 2008, the hydrant water account with the contractor was closed, the hydrant meter had been removed and all hydrant water sales had ceased.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 6 of 19

| Q. | WILL SUNRISE BE SELLING HYDRANT WATER FOR PHASE II OF THE |
|----|---|
| | HAPPY VALLEY PROJECT THAT IS CONTINUING CONSTRUCTION IN |
| | 2009? |

- A. No. The City of Peoria will supply all construction water for Phase II of the project from their water system.
- Q. WAS THE HAPPY VALLEY PROJECT REPRESENTATIVE OF NORMAL CONSTRUCTION WITHIN SUNRISE'S SERVICE AREA?
- A. No. This project was an extremely large regional project, with a budgeted cost in excess of \$35 million, and is not representative of normal construction within Sunrise's service area. As indicated in the Stakeholder Presentation (MEC-R2), the project includes construction of a three-mile long missing link of Happy Valley Road, which required construction of a bridged crossing of the New River. Finally, an additional mile of Happy Valley Road will be improved and numerous additional improvements will be made.
- Q. DOES SUNRISE EXPECT THE CITY OF PEORIA, MARICOPA COUNTY OR
 THE FLOOD CONTROL DISTRICT TO CONSTRUCT ANY PROJECTS OF
 SIMILAR SCOPE WITHIN SUNRISE'S SERVICE AREA IN THE FUTURE?
- A. No. As described above, these projects are large regional projects requiring years of planning that corrected regional flood control and transportation deficiencies within and around the Sunrise service area. To my knowledge, there are no similar projects being planned by any of the agencies, and it is unlikely that any projects of this scope will materialize in the foreseeable future in Sunrise's service area.

1

2

3

Q. COULD YOU SUMMARIZE SUNRISES HYDRANT WATER SALES FOR THE

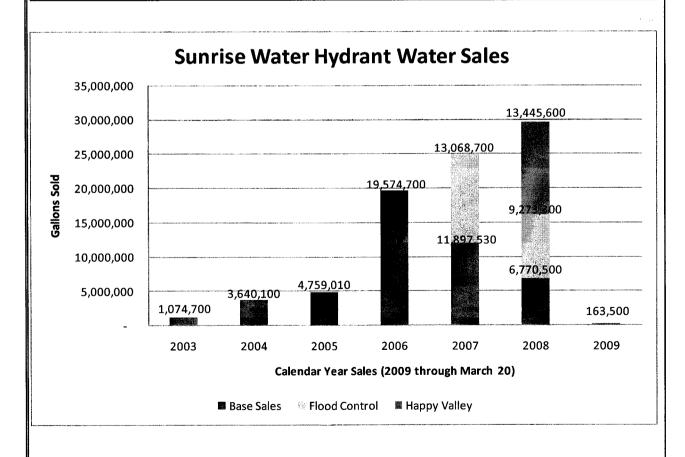

YEARS 2003 THROUGH 2009?

A. Yes, the requested summary is provided in tabular and graphical format below.

| | Sunrise \ | Nater Co. Hyd | irant Meter Sa | les - Summan | y of Gallons So | old | |
|---------------------------|-----------|---------------|----------------|--------------|-----------------|------------|---------|
| | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 |
| Base Sales | 1,074,700 | 3,640,100 | 4,759,010 | 19,574,700 | 11,897,530 | 6,770,500 | 163,500 |
| Flood Control | 1 | | | | 13,068,700 | 9,273,300 | |
| Happy Valley | Ĭ | | | | | 13,445,600 | |
| Total Sales | 1,074,700 | 3,640,100 | 4,759,010 | 19,574,700 | 24,966,230 | 29,489,400 | 163,500 |
| Percentage of Total Sales | | | | | | | |
| Flood Control | 0.0% | 0.0% | 0.0% | 0.0% | 52.3% | 31.4% | 0.0% |
| Happy Valley | 0.0% | 0.0% | 0.0% | 0.0% | 0.0% | 45.6% | 0.0% |

Note: Base Sales are all sales except sales for Flood Control and Happy Valley Projects

Note: 2009 Data is through March 20, 2009

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 8 of 19

Q. HYDRANT WATER SALES FOR THE FIRST THREE MONTHS OF 2009 SEEM TO BE VERY LOW; WHY IS THIS?

A. There are two reasons for the recent low level of hydrant water sales. First, as noted above, both the Flood Control Project and the Happy Valley Project (which constituted the majority of hydrant water sales in 2007 and 2008) are complete, so there are no hydrant water sales for these projects. Second, due to the depressed housing market in the greater Phoenix area, development and construction activity within Sunrise's service area has come to a near complete standstill.

Construction activity is so depressed that during the first three months of 2009, Sunrise had only four hydrant water sales accounts during the quarter, delivering a combined total of 163,500 gallons. If the 1st quarter sales rate continues throughout the year, Sunrise will sell well under 1,000,000 gallons of hydrant water during 2009.

I am not aware of any new projects under planning or design that would significantly raise the current hydrant water sales rate for Sunrise in 2009. Further, I expect hydrant water sales to be similarly depressed through 2010 and beyond. At the current level of sales, 2009 sales would be well below the 2003 sales level.

Q. WHY IS IT APPROPRIATE TO NORMALIZE HYDRANT SALES BY ELIMINATING FLOOD CONTROL SALES?

A. As is indicated above, Sunrise sold a large amount of water for the Flood Control Project during the 2007 test year. The sales for the Flood Control Project represented 52.3% of all hydrant water sales during the test year. Because the sales were so large and due to a large regional project, which is not representative of normal construction within Sunrise's service area, it is appropriate to normalize sales by eliminating the sales for the Flood Control Project from the test year hydrant water sales. Further, the Flood Control Project

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 9 of 19

was complete as of year-end 2008 and will not generate any revenue during 2009 or any portion of the period for which rates will be in effect. Finally, no other large projects are expected within Sunrise's service area which could supply replacement revenue for the Flood Control Project during the period for which rates will be in effect. Without Sunrise's proposed normalization adjustment, test year revenues would not represent revenues on a going-forward basis and would create a mismatch between revenue and ratebase.

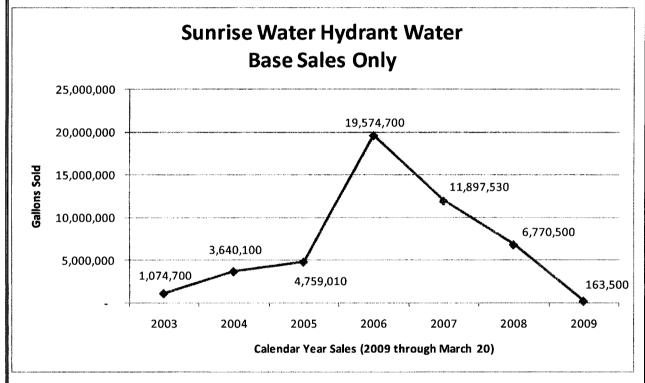

Q. DOES YOUR RECOMMENDED ELIMINATION OF THE FLOOD CONTROL SALES TAKE INTO CONSIDERATION THE EFFECT OF THE HAPPY VALLEY PROJECT?

A. Yes it does. As noted above, the Happy Valley Project, while generating a large volume of hydrant water sales in 2008, is nothing more than a short-term, nonrecurring regional construction project that provided a one-time benefit to Sunrise's hydrant meter sales. The construction of the Happy Valley Project in 2008 and the associated hydrant water sales by Sunrise, is not in any way indicative of the level of hydrant water sales that Sunrise will experience on a going forward basis.

Q. WHY IT IS APPROPRIATE TO AVERAGES BASE HYDRANT WATER SALES OVER THE FIVE-YEAR PERIOD 2003 THROUGH 2007?

A. As seen in the graph below, Sunrise's base hydrant water sales peaked dramatically in 2006. Beginning in the 2007 test year and continuing through 2008 and 2009, hydrant water sales have steadily declined and are projected to be at or below 2003 levels in 2009. This pattern of hydrant water sales is directly correlated with the Phoenix area housing boom and bust cycle. This graph clearly demonstrates that the 2007 test year sales of 11,897,530 gallons are significantly above a normal level of hydrant sales for Sunrise and represent an unsustainable level of hydrant water sales. Hydrant water sales

peaked in 2006 and began rapidly trending back to historic levels during the 2007 test year. A five-year average is a reasonable method to normalize hydrant water sales to represent expected sales on a going forward basis. Without Sunrise's proposed normalization adjustment, test year revenues would not represent revenues on a going-forward basis and would create a mismatch between revenue and ratebase.

Q. STAFF STATES THAT INCLUDING THREE YEARS OF VERY LOW WATER SALES (2003-2005) RESULTS IN AN UNDERSTATEMENT OF NORMALIZED HYDRANT SALES. DO YOU AGREE?

A. No. As shown above base hydrant water sales peaked sharply in 2006, began a steady decline in 2007, and in 2009 are trending below 2003 levels. Contrary to Staff's assertion, inclusion of the 2003-2005 sales is necessary to normalize Sunrise's hydrant water sales for Sunrise. Given the extreme collapse of the development and housing market, it is likely that Sunrise's going-forward hydrant water sales will be well below

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 11 of 19

the five-year average level of sales. Failure to do a five-year average that includes the lower period of sales would result in normalized hydrant water sales much greater than actual hydrant water sales for the years that the rates will be in effect.

V <u>OUTSIDE SERVICES</u>

Q. DO YOU AGREE WITH STAFF'S ADJUSTMENT NO. 6 PERTAIING TO OUTSIDE SERVICES?

A. No, I do not. Staff asserts that the services provided by SRW Consulting are for lobbying activities that are not directly beneficial to ratepayers and proposes to remove the cost from Sunrise's rates. I disagree with Staff's assertion.

Q. DO THE SERVICES PROVIDED BY SRW CONSULTING BENEFIT SUNRISE'S CUSTOMERS?

A. SRW Consulting assists Sunrise with regulatory compliance by providing regulatory and legislative monitoring and reporting services. In addition, SRW assists Sunrise to develop communication strategies and manage issues encountered at State regulatory agencies including the Commission. These services help ensure Sunrise is aware of new regulatory and legal requirements and assist Sunrise in maintaining productive relationships with the numerous agencies that oversee its operation. Sunrise procures these services because keeping current with new regulatory and legal requirements and maintaining good relationships with regulatory agencies is a vital component of providing water service in a heavily regulated business environment. Accordingly, I believe the services provided by SRW Consulting do directly benefit Sunrise's customers.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 12 of 19

| 1 | Q. | DO YOU CONSIDER THE SERVCIES PROVIDED BY SRW CONSULTING |
|----|----|--|
| 2 | | LOBBYING? |
| 3 | A. | SRW Consulting rarely provides services for Sunrise that I would consider lobbying. In |
| 4 | | Arizona, lobbying is generally defined as attempting to influence the passage or defeat of |
| 5 | | any legislation by directly communicating with any legislator or attempting to influence a |
| 6 | | formal rule making proceeding by directly communicating with any state officer or |
| 7 | | employee. As described above, the vast majority of the services provided by SRW |
| 8 | | Consulting are not lobbying. |
| 9 | Q. | IS SUNRISE WILLING TO COMPROMISE IN ORDER TO ACCOMDATE |
| 10 | | STAFF'S POSITION ON THIS ISSUE? |
| 11 | A. | Yes. In recognition that SRW Consulting occasionally engages in lobbying activities for |
| 12 | | Sunrise, Sunrise has adjusted its rebuttal case to include 50% of the cost of the services |
| 13 | | provided by SRW Consulting. |
| 14 | VI | BARN, WORKSHOP, STORAGE, FIELD OFFICE AND YARD RENT |
| 15 | Q. | HAVE YOU REVIEWED STAFF'S PROPOSED OPERATING INCOME |
| 16 | | ADJUSTMENTS NO. 8 AND NO. 9 REGARDING LEASE COSTS FOR BARN, |
| 17 | | WORKSHOP, STORAGE, FIELD OFFICE AND YARD RENTAL. |
| 18 | A. | Yes I have. Staff is recommending disallowance of a total of \$37,595 in lease expense |
| 19 | | for these facilities. Specifically, OI-8 disallowed the Barn, Workshop and Storage |
| 20 | | expenses of \$12,487.00 and Staff Report OI-9 disallowed the field office and yard rent |
| 21 | | expenses of \$25,108.00. |
| 22 | Q. | DO YOU AGREE WITH STAFF'S ADJUSTMENTS? |
| 23 | A. | No. |

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 13 of 19

Q. WHY DOES SUNRISE LEASE THE BARN, WORKSHOP, STORAGE AND OFFICE FACILITES FROM MR. CAMPBELL?

A. The supplies, material, tools, and equipment stored at these locations include brass fittings and copper tubing, hand tools and power equipment and other miscellaneous water facilities piping and fittings. These types of items are highly susceptible to theft and vandalism. The location has a single source of ingress and egress and is a fenced and occupied, large acreage, ranch-style, residential property. These features provide excellent security and protect the items from theft and damage. In addition, Sunrise records are stored in secure containers on the property. The workshop in the barn is used by field crews to make repairs and to perform other equipment functions, and the field office is used for field crew meetings and staging.

Q. STAFF ASSERTS THAT THAT THERE IS NO EVIDENCE THAT SUNRISE UTILIZES THE WORKSHOP OR THAT IT IS NECESSARY FOR THE PROVISION OF SERVICE. DO YOU AGREE?

A. No, the workshop is used by our field personnel on a regular basis and contained water company materials and parts at the time of Staff's visit. Small parts and tools are stored within the workshop to work on such items as fittings on hydrant meters, chlorine pumps and motors, small booster pumps and motors, and other water distribution and pumping equipment. Additionally, Sunrise personnel perform minor maintenance on the vehicles at the workshop/barn location, such as oil changes and washing the vehicles.

Q. WHERE HAS STAFF RECOMMENDED STORING THESE SUPPLIES PERFORMING THESE FUNCTIONS?

A. Staff recommended using Sunrise Water Co. Well No. 7 for the storage of materials and equipment. Staff recommended using an off-site storage facility for records. Staff indicated that they did not find any evidence the workshop was used by Sunrise and did

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 14 of 19

not recommend an alternative. Finally, Staff indicated that there was an office in Sunrise's corporate office that could be used for crew meetings and staging.

Q. IS STAFF'S RECOMMENDATION TO USE WELL SITE NO. 7 FEASIBLE?

A. In order to secure the supplies, material and tools at Well Site No. 7, Sunrise would have to construct a new, adequately-sized, building. We estimate the construction cost of a structure of adequate size to replace the existing facilities would be at least \$150,000.00, including design and permitting. There would also be significant monthly utility bills for electricity, sewer, garbage, and security services. Contrary to Staff's assertion that use of Well Site No. 7 would be at no cost to ratepayers, the resulting revenue requirement and the associated monthly operating costs associated with a building would be significant.

However, cost is not the biggest obstacle to overcome. Well No. 7 is located within unincorporated Maricopa County and is zoned R43, which is a minimum one-acre residential lot. Maricopa County R43 zoning allows for water wells and booster stations to be installed, but the Maricopa County R43 zoning does not permit building any type of office or storage facility on the site.

Construction of a storage facility will require either a Special Use Permit or rezoning of the site. Under County zoning regulations, a Special Use Permit is only allowed if the County considers a storage facility as being attendant to the primary use of the site as a booster station. It is unlikely that the county would consider a material and equipment storage facility attendant to the use of the site as a booster station. Rezoning the site is likely to prove more problematic. Zoning applications in the Sunrise service area are routinely challenged to protect the one-acre home sites from commercial traffic and disruption, making the probability of rezoning the site low.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 15 of 19

Considering the cost and time required to apply for a Special Use Permit or rezone the site and the low likelihood of success, the use of the Well No. 7 site for storage is speculative at best.

Q. IS THERE AN OFFICE IN SUNRISE'S CORPORATE OFFICE AVAILABLE FOR FIELD PERSONNEL USE?

A. No there is not. The office referenced by Staff is Sunrise's customer service office occupied by Sharon Chambers on a full time basis. Ms. Chambers conducts billing activities, answers customer calls, meets with customers, and performs accounts payable functions from the office. Sunrise's Operations Supervisor, Trent Schimmel, does have a desk in the office for his personal use when he visits the office to coordinate with Ms. Chambers on customer service matters, such as receiving and closing customer generated service orders and delivering meter readings. The office is not adequately sized or available to stage field crews or accommodate other field crew needs.

Q. HAS THE COMMISSION ADDRESSED THESE ISSUES PREVIOUSLY?

- A. In the recent West End Water Co. ("West End") rate case, Docket No. W-01157A-06-0004, Decision No. 68925 dated August 29, 2006, the Commission included expenses of \$12,286.00 for rental expense for these facilities. Using the standard 80% / 20% split of costs between Sunrise and West End, this equates to an expense of \$49,144.00 for Sunrise.
- Q. WHAT IS SUNRISES CURRENT POSITION REGARDING LEASE COSTS FOR WORKSHOP, STORAGE AND FIELD OFFICE SPACE ADDRESSED BY STAFF'S OPERATING INCOME ADJUSTMENTS NO. 8 AND NO. 9?
- A. Sunrise believes Staff's proposed adjustments should be rejected. The facilities in question are used and useful to Sunrise and are used in the provision of service to

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Marvin E. Collins Page 16 of 19

Sunrise's customers. The Commission has recently included these expenses in the rates of Sunrise's sister company, West End, and should likewise allow them for Sunrise.

Staff's assertion that Well Site No. 7 could be used as a no-cost option should be rejected.

VII INCOME TAX EXPENSE

Q. HAS STAFF RECOMMENDED RECOVERY OF INCOME TAX EXPENSE?

A. No. Staff recommends no income expense for Sunrise since Sunrise is a subchapter S corporation exempt from corporate income tax.

Q. DOES SUNRISE AGREE WITH STAFF'S RECOMMENDATION?

A. No, we do not.

Q. WHAT IS SUNRISES POSITION ON INCOME TAX?

A. Mr. Jones provides the details of our position in his testimony. In summary, while Sunrise may be technically exempt from corporate income tax, the business enterprise is not exempt from income tax. Each year Sunrise prepares an income tax return and Mr. Campbell includes the taxable income from Sunrise on his personal tax return and pays the income tax resulting from Sunrise's net income. This is a real cost and is fundamentally no different than the numerous C corporations whose parent companies include their income in the parent's consolidated tax return. The Commission has included income tax expense in Sunrise's and other similar providers' previous rate cases and should include income tax expense in the current instance.

Q. IF STAFF'S RECOMMENDATION IS ADOPTED WHAT IMPACT WILL THIS HAVE ON SUNRISE?

A. Sunrises' revenues will be reduced by the amount of the income tax expense plus the resulting savings in property tax. This will, in turn, reduce the after tax net income of Sunrise by \$30,000 to \$40,000 depending upon resolution of other contested issues in the

24

case. Mr. Jones calculates that this is equivalent of reducing the recommended return on equity from 10.0% to 7.02%.

4 HOW WILL THIS AFFECT SUNRISE ON A GOING-FORWARD BASIS?

A. The loss of revenue will translate directly into a decrease in the availability of funds for

Q. WHAT IS SUNRISE'S RECORD OF MAKING IMPROVEMENTS TO THE SUNRISE SYSTEM?

Sunrise to continue making needed improvements to its system.

A. Unlike many small water companies in Arizona, Sunrise has consistently invested in its water system. The investment has taken the form of direct investment in land, plant and facilities and through line extension agreement refunds that exceed the Commission minimum requirements. This record of investment is evidenced by Sunrise's nearly \$1.2 million dollars in rate base that stands in stark contrast to many other similarly situated water companies that have small or even negative rate base. Because of this investment, Sunrise is a healthy water utility that provides a high level of service to its customers.

The following are examples of recently completed improvement projects funded by Sunrise.

- Replacement of well pump at Well No. 3
- Replacement of well pump at Well No. 5
- Installation of Well No. 6
- Installation of ½-mile long transmission main from Well No. 6 to Well No. 4

 Booster Station
- Expansion of Well No. 4 Booster Station
- Installation of Well No. 7 and the Well No. 7 Booster Station (Arsenic Remediation Project)

| 4 | | Mariposa Grande | | | |
| 5 | Q. | PLEASE DESCRIBE YOUR PLANS FOR FUTURE IMPROVEMENTS TO THE | | | |
| 6 | | SUNRISE SYSTEM? | | | |
| 7 | A. | Sunrise has plans to drill and equip a new well, construct a new well transmission main, | | | |
| 8 | | construct an additional water storage tank at the Well No. 4 site, complete several water | | | |
| 9 | | main improvement projects, and other related pumping and distribution projects. | | | |
| 10 | Q. | HISTORICALLY, FROM WHERE HAVE THE FUNDS FOR THESE | | | |
| 11 | | IMPROVEMENTS COME? | | | |
| 12 | A. | There have been two sources of funds, retained earnings and equity infusions from Mr. | | | |
| 13 | | Campbell. | | | |
| 14 | Q. | HOW DO YOU PLAN TO ACQUIRE FUNDS FOR CAPITAL EXPENDITURES | | | |
| 15 | | IN THE FUTURE? | | | |
| 16 | A. | Sunrise will continue to use retained earnings and will seek equity infusions from Mr. | | | |
| 17 | l. | Campbell when appropriate. In addition, Sunrise plans to add debt to its capital structure | | | |
| 18 | | through the use of WIFA or other available loan funds. | | | |
| 19 | Q. | EARLIER YOU MENTIONED THAT THE LOSS OF REVENUE DUE TO | | | |
| 20 | | DISALLOWANCE OF INCOME TAX WILL RESULT IN A DECREASE IN THE | | | |
| 21 | | AVAILABILTY OF FUNDS. COULD YOU ELABORATE ON THAT | | | |
| 22 | | CONCLUSION? | | | |
| 23 | A. | The loss of revenue will directly impact availability of funds in the following three ways. | | | |

- 1 2
- 3
- 4 5
- 6
- 7
- 8
- 9 10

Q.

- 11
- 12
- 13
- 14
- 15
- 16
- 17
- 18

19

A. Yes.

- Retained earnings available for capital improvements will be reduced dollar for dollar by the amount of the disallowed of income tax expense.
- The reduction in revenue will reduce cash flow thereby reducing debt coverage ratios, reducing the availability of debt financing from WIFA or other debt providers.
- Since income taxes must be paid on the income generated by Sunrise, Mr. Campbell will experience a significant reduction on real return on equity for Sunrise. As with any business enterprise, a diminished return on equity for Sunrise will negatively impact its ability to raise additional capital from its shareholder, Mr. Campbell.
- WHAT IS YOUR OVERALL ASSESMENT OF STAFF'S PROPOSED DISALLOWANCE OF INCOME TAX EXPENSE FOR SUNRISE?
- A. The proposed disallowance of income tax is not appropriate for Sunrise. The Commission has authorized income tax expense in the past for Sunrise, and Sunrise has used that money to make capital investments for the benefit of its customers. The result is a healthy utility that provides excellent service to its customers. Denial of income tax expense at this point, while not the intent of Staff, nevertheless would weaken Sunrise's financial condition. The reduced cash flow would reduce Sunrise's ability to continue its record of making prudent investments into maintaining and growing its water system.
- DOES THIS CONCLUDE YOUR DIRECT TESTIMONY? Q.

EXHIBIT

MEC - R1

83rd Avenue/Pinnacle Peak Road Drainage Improvement Project

October 2005

PROJECT DESIGN BULLETIN

The Flood Control District of Maricopa County (District), in partnership with the City of Peoria and the Maricopa County Department of Transportation, is designing drainage improvements for the vicinity of 83rd Avenue/Pinnacle Peak Road. The purpose of this bulletin is to familiarize the public with the project's features and announce an upcoming public information meeting that will be held on Wednesday, November 2, from 6:00 to 7:30 p.m., at the Sunrise Mountain High School North Campus (see back page for further details).

Why is this project needed?

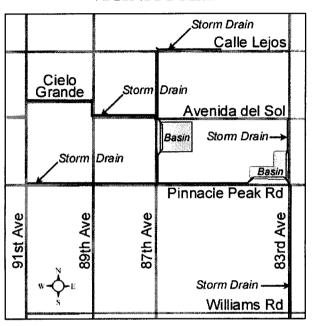

In the area between 83rd and 91st Avenues, storm water runoff drains to the south from the Sunrise Mountains towards Deer Valley Road. However, many of the streets in this area lack a storm drain system. Piecemeal growth has resulted in development without adequate flood control and drainage infrastructure. Consequently, some local properties and area streets have experienced repeated flooding. Over the years, the flooding has caused property damage, erosion, and sedimentation problems, such as sand "islands" forming in roadways.

The project will be designed to mitigate storm water flooding in the area from Calle Lejos to Pinnacle Peak Road between 83rd and 91st Avenues. Storm runoff in this area will be collected and conveyed by drainage pipes to detention basins. Without these improvements, storm water would be expected to continue to cause flooding of the streets and neighborhoods in the area.

What will be built?

The proposed improvements include the construction of detention basins at the northwest corner of 83rd Avenue and Pinnacle Peak Road

VICINITY MAP

and at the southeast corner of Avenida del Sol and 87th Avenue. New storm drains along Calle Lejos, Cielo Grande, Avenida del Sol, Pinnacle Peak Road, 83rd Avenue, 87th Avenue, and 89th Avenue will collect storm water and convey it to the basins via a system of pipes. The collected water will then be discharged at a controlled rate into a storm drain that will direct the water south under 83rd Avenue. The new system ultimately drains into an existing open channel on the east side of 83rd Avenue south of Williams Road.

What will it look like?

The District's aesthetics and open space goal is to enhance the year-round value of its facilities by incorporating features that will preserve the natural landscape, protect and enhance local community character,

improve the aesthetic value of its properties, and provide opportunities for recreation activities. Thus, detention basins are often designed to provide both flood control and recreational uses for adjacent residents. At this time, the District anticipates that the 87th Avenue basin will be designed to accommodate recreational uses. Due to its depth and steep sides, the Pinnacle Peak basin will not be accessible for recreational use.

A Project Aesthetics Advisory Committee (PAAC) that includes local neighborhood residents has been formed to evaluate multi-use opportunities and aesthetics issues specific to the area. The PAAC will meet several times during the course of the design process to review concepts and provide input to the project team.

What has been done so far?

The District began preliminary investigations for the proposed improvements in 2004. This pre-design phase consisted of evaluating possible sites, layouts, and configurations for detention basins, identifying multi-use opportunities and aesthetic issues, and preparing the concept and site development plans. The results of the preliminary phase were presented at a public meeting on November 8, 2004.

Since that time, the District has improved the drainage system's design and expanded the project to provide flood mitigation for a larger area, reaching as far west as 91st Avenue. This was done to provide adequate drainage controls for more residences and properties in the area that have experienced flooding in the past. The changes that have come about in the design are highlighted below (inset). Both the new and previous concepts will be available for viewing at the November 2 public meeting.

How can you participate?

The District is committed to providing a clear understanding of the proposed improvements to the public and to listening to your concerns and suggestions. The upcoming public information meeting will continue the dialogue between the District and the public about the 83rd Avenue/Pinnacle Peak Road Drainage Improvement Project.

Following the November 2 public meeting, the District will prepare the final design and construction documents, giving full consideration to public input on the preliminary project concepts. A follow-up bulletin and public information meeting are planned for early 2006.

How is the new design different than the original concept?

The project team has investigated several modifications of the previous concept to improve the effectiveness of and increase the area protected by the proposed drainage improvements. The changes include the following:

- The new concept for this project provides flood control protection for a larger area, extending westward to 91st Avenue. With the new concept, storm drains will extend west to 91st Avenue along Cielo Grande, Avenida del Sol, and Pinnacle Peak Road. The previous storm drain concept extended west to 89th Avenue.
- The detention basin originally located north of Calle Lejos east of 87th Avenue has been eliminated and replaced with a basin at the southeast corner of Avenida del Sol and 87th Avenue. The new site has a larger area available for the drainage improvements, increasing its potential detention capacity, and provides a better opportunity for other uses.
- Water collected along Calle Lejos will be transmitted in pipes south along 87th Avenue. Originally, this water was to be conveyed east to the Pinnacle Peak basin in a series of pipes and open channels. However, detailed studies and hydrologic analysis show that the system will function more efficiently with the new configuration.

- 2 Ray L. Jones testifies as follows:
- 3 Mr. Jones sponsors Sunrise's rebuttal revenue requirement.
- 4 Mr. Jones accepts a number of Staff income statement adjustments.
- Mr. Jones sponsors rate base and operating income and details Sunrise's rebuttal positing pertaining to remaining points of disagreement with Staff.
 - Sunrise proposes to make a pro-forma adjustment for one-half of a developer Advance refund that had accrued and become payable as of the end of the test year. The refund was based on six months of test-year revenue and six months of post-test-year revenue.
 - As discussed in detail by Mr. Collins, test-year hydrant-water sales should be normalized.
 - As discussed in detail by Mr. Collins, Sunrise proposes to remove 50% of the \$27,000 in outside services proposed to be removed by Staff.
 - As discussed in detail by Mr. Collins, it is appropriate to include \$37,595 in lease expense for workshop, storage and field office space facilities. Staff's adjustment should be rejected.
 - Only some of Staff's property-tax adjustments are appropriate.
 - As discussed in detail by Mr. Collins, it is appropriate to recognize income-tax expense. Further, this is consistent with the Commission's past allowance of this expense for Sunrise and for other S corporations and LLCs. Finally, disallowing income-tax expense would effectively reduce Sunrise's authorized return from 10% to 7.02%.
 - Staff's proposal to increase base charges to yield higher revenues from monthly minimum charges is acceptable. However, it would be unwise to decrease the break-over point between the second and third tier from 18,000-gallons to 13,000-gallons.
 - Mr. Jones sponsors attached Exhibit RLJ-R1 containing the following updated schedules referenced in his rebuttal testimony.
 - Schedule A-1 Rebuttal
 - Schedule B-1 Rebuttal
 - Schedule B-2 Rebuttal
- 29 Schedule C-1 Rebuttal
 - Schedule C-2 Rebuttal
- 31 Schedule H-3 Rebuttal

1 Schedule H-3 Rebuttal 2 Ш REBUTTAL REVENUE REQUIREMENT 3 Q. WHAT IS SUNRISE'S REBUTTAL REVENUE REQUIREMENT? 4 A. Sunrise's rebuttal revenue requirement is shown on Schedule A-1 Rebuttal. Sunrise has 5 reduced its requested revenue increase to \$217,866, an increase of 16.70% over adjusted 6 test-year revenues of \$1,304,363. 7 Q. WOULD YOU SUMMARIZE SUNRISE'S AND STAFF'S REVENUE 8 **REQUIREMENT POSITIONS?** 9 A. The proposed revenue requirements and associated rate increases are summarized as 10 follows: 11 Revenue Requirement Revenue Increase % Increase Sunrise Direct \$1,590,295 12 \$285,932 21.92% 13 Staff Direct \$1,378,396 \$26,218 1.94% 14 Sunrise Rebuttal \$1,522,229 \$217,866 16.70% IV15 **COST OF CAPITAL** DOES SUNRISE ACCEPT STAFF'S COST OF CAPITAL RECOMENDATION? 16 Q. 17 Yes, Staff has recommended adoption of Sunrise's proposed 10 percent Fair Value Rate A. 18 of Return. \mathbf{V} 19 ACCEPTED STAFF ADJUSTMENTS WHICH OF STAFF'S RATE BASE ADJUSTMENTS DOES SUNRISE ACCEPT? 20 Q. A. 21 Sunrise accepts Staff Rate Base Adjustment No. 1, which increases accumulated 22 depreciation by \$135,964 over Sunrise's proposal of \$2,492,247. I have added Rate Base 23 Adjustment RLJ-9 (Page 11, Schedule B-2 Rebuttal) to reflect acceptance of this Staff 24 adjustment.

Q. WHICH OF STAFF'S OPERATING INCOME ADJUSTMENTS DOES SUNRISE ACCEPT?

A. Sunrise accepts the following Operating Income Adjustments:

| 4 | Operating Income | | |
|----|-----------------------|---------------------------------|-------------------|
| 5 | <u>Adjustment No.</u> | Expense Category | Adjustment Amount |
| 6 | 2 | Salaries and Wages | (\$68,913) |
| 7 | 3 | Salaries and Wages | \$4,243 |
| 8 | 5 | Office Supplies Expense | (\$1,500) |
| 9 | 7 | Water Testing Expense | \$2,184 |
| 10 | 10 | Rent Expense | \$1,500 |
| 11 | 11 | Rent Expense | \$19,521 |
| 12 | 12 | Transportation Expense | (\$3,508) |
| 13 | 13 | Transportation Expense | (\$8,485) |
| 14 | 14 | Transportation Expense | (\$6,300) |
| 15 | 16 | Miscellaneous Expense | (\$2,285) |
| 16 | 17 | Miscellaneous Expense | \$6,413 |
| 17 | 18 | Miscellaneous Expense | \$50,216 |
| 18 | 19 | Miscellaneous Expense | (\$19,521) |
| 19 | 20 | Depreciation Expense | <u>\$10,210</u> |
| 20 | | | |
| 21 | Total accept | ed Operating Income Adjustments | (\$16,225) |

Q. HOW DID YOU REFLECT SUNRISE'S ACCEPTANCE OF THESE STAFF OPERATING INCOME ADJUSTMENTS?

A. I added Income Statement Adjustment RLJ-19 (Page 23, Schedule C-2 Rebuttal) incorporating all of the accepted Staff Operating Income Adjustments.

VI <u>RATE BASE</u>

- Q. WHAT IS THE REMAINING DISAGREEMENT BETWEEN SUNRISE AND STAFF REGARDING RATEBASE?
- A. Sunrise proposed Rate Base Adjustment RLJ-6 decreasing Sunrise's Advance balance by \$128,356 to reflect the refund of Advances made in August of 2008. Staff rejects Sunrise's proposal and offers its Rate Base Adjustment No.2 restoring \$128,356 to Sunrise's Advance balance.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 4 of 20

Q. PLEASE SUMMARIZE STAFF'S POSITION REGARDING THE AIAC BALANCE?

A. Staff argues that Sunrise's proposal to reduce test-year end AIAC by the amount of a post-test-year refund creates a mismatch between investor provided capital and revenue that is inconsistent with sound ratemaking principals.

Q. DO YOU AGREE WITHS STAFF'S POSITION?

A. No I do not. A.A.C. R14-2-103 prescribes the requirements for a filing in support of a proposed increase in rates or charges of a public service corporation. The requirements include provisions for pro forma adjustments which are defined as "adjustments to actual test-year results and balances to obtain a normal or more realistic relationship between revenues, expenses and rate base." I believe Rate Base Adjustment RLJ-6 is appropriate and provides a more realistic relationship between revenues and rate base.

Q. PLEASE ELABORATE?

A. The refund payment made in August of 2008 is required by Commission rules and is based on revenues generated during the period July 1, 2007, through June 30, 2008. By the end of the 2007 test year, six months of revenue for the 12-month refund period had been received by Sunrise. Receipt of this revenue creates a known and measureable liability for refund of Advances during the test year. This is fundamentally no different than accruing the cost of electricity or any other operating expense which has been incurred but not yet paid by the end of the test year. Since the refund obligation was accrued during the test year, it is appropriate to include the known and measureable refund amount as a pro-forma adjustment to rate base.

18

19

20

21

22

23

Q. IS SUNRISE WILLING TO COMPROMISE IN ORDER TO ACCOMDATE STAFF'S POSITION ON THIS ISSUE?

A. Yes. Sunrise has revised its proposed Rate Base Adjustment RLJ-6 to include only 50% of the August 2008 refund amount. Sunrise has proposed a 50% reduction in recognition that the payment is based on six months of revenue received during the test year and six months of revenue received post test year. In summary, Sunrise proposes to make a proforma adjustment for that portion of the Advance refund that had accrued and become payable as of the end of the test year. This compromise position creates a more realistic relationship between rate base and revenue as of the end of the test year.

Q. WOULD YOU SUMMARIZE SUNRISE'S AND STAFF'S RATE BASE POSITIONS?

A. Sunrise's and Staff's rate base positions are summarized as follows:

| 13 | | Sunrise Direct | Staff Direct | Sunrise Rebuttal |
|----|--------------------|----------------|--------------|------------------|
| 14 | Adjusted Rate Base | \$1,448,154 | \$1,183,834 | \$1,248,012 |

VII OPERATING INCOME

A HYDRANT-WATER SALES

Q. WHAT IS STAFF'S RECOMMENDATION REGARDING SUNRISE'S PROPOSAL TO NORMALIZE HYDRANT-WATER SALES REVENUE?

A. Staff has proposed Operating Income Adjustment No. 1, rejecting Sunrise's proposal to normalize hydrant-water sales, which has the effect of increasing test-year revenue by \$47,815. Additionally, Staff has proposed Operating Income Adjustment No.4, rejecting Sunrise's proposal to normalize power costs consistent with the normalized level of hydrant-water sales. Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 6 of 20

19

20

21

Q. HAS SUNRISE CHANGED ITS POSITION REGARDING NORMALIZATION OF HYDRANT-WATER SALES?

- A. No, it has not. As explained by Mr. Collins in his rebuttal testimony, Sunrise's base hydrant-water sales¹ peaked dramatically in 2006 and began a steady decline to historic levels beginning in the 2007 test year and continuing through 2008 and 2009. As explained by Mr. Collins, this pattern of hydrant-water sales combined with sales, for the Flood Control Project, resulted in 2007 test-year sales significantly above a normal and sustainable level of hydrant sales for Sunrise.
- Q. WHY HAS SUNRISE PROPOSED TO NORMALIZE HYDRANT-WATER SALES?
- A. As required by A.A.C. R14-2-103, Sunrise is proposing a pro-forma adjustment to establish a normal and more realistic relationship between test-year revenue and the rate base used to generate the revenue.
- Q. WHAT IS SUNRISE'S METHOD OF NORMALIZATION OF HYDRANT-WATER SALES?
- A. Sunrise has made two adjustments to normalized hydrant-water sales:
 - Income Statement Adjustment RLJ-8:
 - o removes hydrant-water sales for the Flood Control Project from the test-year hydrant-water sales, and
 - calculates a five-year average of hydrant-water sales for years 2003 2007 to
 represent a normalized level of hydrant-water sales.

¹ Mr. Collins defines base sales as total hydrant-water sales less sales for the Flood Control Project and the Happy Valley Project.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 7 of 20

1 2

 Income Statement Adjustment RLJ-9 reduces pumping-power expense to reflect the lower normalized level of hydrant-water sales.

3

4

Q. PLEASE SUMMARIZE STAFF'S OBJECTION TO SUNRISE'S PROPOSED NORMALIZATION OF HYDRANT-WATER SALES?

5

A.

Staff concludes that Sunrise's hydrant sales normalization proposal is not consistent with the rate making concept of normalization. They support this conclusion with the following statements.

8

7

• Sunrise recorded low levels of hydrant-water sales between 2003 and 2005.

9

• In 2006 and 2007, Sunrise's revenues from hydrant-water sales increased significantly.

1011

• From the information provided by Sunrise, there has been no significant fluctuation of hydrant-water sales. Rather there has been a steady rise in revenues for hydrant-water sales.

13

14

12

 Sunrise's water sales in 2008 exceeded 2007 levels and included continued sales to the Maricopa County Flood Control District and sales for the new Happy Valley Project.

1516

17

• Sunrise's statement that future hydrant-water sales could be overstated if test-year hydrant-water sales is not normalized, is speculative. The timing and impact of such an occurrence is not known and measureable at this time.

18 19

Q. PLEASE EXPLAIN WHY STAFF'S CONCLUSION SHOULD BE REJECTED?

2122

20

A. I will take each of Staff's points in turn.

23

2005 are not "low"; rather, as explained by Mr. Collins, they are representative of normal levels of hydrant-water sales for Sunrise. Since they are representative of

Contrary to Staff's assertion, the levels of hydrant-water sales between 2003 and

24

- normal levels of hydrant-water sales, it is essential they be used in a five-year average to normalize the unusually high level of sales recorded during the 2007 test year.
- Sunrise agrees with Staff's assertion that Sunrise's revenues from hydrant-water sales increased significantly in 2006 and 2007. However, Mr. Collin's testimony establishes that the increase in sales is not representative of expected sales on a going forward basis. Therefore, the unsustainable increase in hydrant-water sales is, contrary to Staff's assertion, actually justification for normalizing Sunrise's hydrant-water sales.
- Staff's statement that water sales have not fluctuated, but have instead been on a steady rise is correct, to a point. Mr. Collins explains that the increase in 2007 and 2008 was entirely due to water sales to the Flood Control Project and the Happy Valley Project. These two projects account for 52.3% of sales in 2007 and 77.0% of sales in 2008. Mr. Collins explains that these projects were not representative of ongoing construction activity in Sunrise's service area and are now completed. Mr. Collins establishes that Sunrise is not experiencing the level of sales associated with these projects in 2009, and that Sunrise cannot expect this level of sales in the foreseeable future. Lastly, Mr. Collins explains that during 2007 and 2008, base hydrant-water sales were actually decreasing dramatically. Mr. Collins' detailed analysis of the hydrant sales data shows that the steady rise in sales is entirely the result of non-recurring projects that mask a significant fluctuation in base sales, which should be normalized.
- Staff's statement that Sunrise's water sales in 2008 exceeded 2007 levels and
 included continued sales to the Maricopa County Flood Control District and sales for
 the new Happy Valley Project is correct, but incomplete. Mr. Collins establishes that
 these projects were not representative of on-going construction in the Sunrise service

A.

- area and that, as of year-end 2008, hydrant-water sales to both of these projects had ceased. Since Sunrise will receive no revenue from these projects during the period for which rates will be in effect, the one-time benefit to hydrant-water sales in 2008 from these projects is not relevant to Sunrise's proposal to normalize test-year hydrant-water sales.
- It was not speculative, as asserted by Staff, for Sunrise to state that future hydrant-water sales could be overstated if test-year hydrant-water sales were not normalized. Mr. Collins establishes through his analysis of base hydrant-water sales that the 2006 peak in hydrant sales was followed by a steady decline in 2007 and 2008 toward historic levels of sales. This decline was recognized by Sunrise at the time it prepared its filing and is precisely why Sunrise proposed normalizing hydrant-water sales. As established by Mr. Collins, the impact of the decline is known and measureable and failing to normalize hydrant sales will result in overstatement of test-year hydrant-water sales.

Q. PLEASE SUMMARIZE SUNRISE'S POSITION ON NORMALIZING HYDRANT-WATER SALES?

Sunrise sold a large amount of water for the Flood Control Project during the 2007 test year. Since the sales were so large and were due to a large regional project that is not representative of normal construction within Sunrise's service area, it is appropriate to normalize sales by eliminating the sales for the Flood Control Project from the test-year hydrant-water sales. Due to the housing boom in the Phoenix market, base hydrant-water sales peaked sharply in 2006, began a steady decline in 2007, and in 2009 are expected to be below 2003 levels. A five-year average of base hydrant-water sales over the period 2003-2007 is an appropriate method to normalize hydrant-water sales. Without Sunrise's proposed normalization adjustment, test-year revenues will not represent revenues on a

|----|-----------------|---|
| 1 | | going forward basis and create a mismatch between revenue and rate base. Staff's |
| 2 | | proposed Operating Income Adjustment No. 1 and Operating Income Adjustment No. 4 |
| 3 | | should be rejected. |
| 4 | | B <u>OUTSIDE SERVICES</u> |
| 5 | Q. | WHAT IS SUNRISE'S POSITION REGARDING STAFF PROPOSED |
| 6 | | OPERATING INCOME ADJUSTMENT NO. 6? |
| 7 | A. | As explained by Mr. Collins in his rebuttal testimony, the Commission should not accept |
| 8 | | Staff's adjustment to disallow \$27,000 in outside services provided by SRW Consulting. |
| 9 | | Mr. Collins has instead proposed an adjustment eliminating \$13,500 or 50% of the cost of |
| 10 | | the services provided by SRW Consulting. |
| 11 | Q. | HOW DID YOU ACCOUNT FOR THE \$13,500 REDUCTION IN OUTSIDE |
| 12 | | SERVICES PROPOSED BY MR. COLLINS? |
| 13 | A. | I added Income Statement Adjustment RLJ-20 (Page 24, Schedule C-2 Rebuttal) |
| 14 | | reducing test-year outside services expense by \$13,500. |
| 15 | | C BARN, WORKSHOP, STORAGE, FIELD OFFICE AND YARD RENTAL |
| 16 | Q. | WHAT IS SUNRISE'S POSITION REGARDING STAFF PROPOSED |
| 17 | | OPERATING INCOME ADJUSTMENT NO. 8 AND OPERATING INCOME |
| 18 | | ADJUSTMENT NO. 9? |
| 19 | A. | As explained by Mr. Collins in his rebuttal testimony, the adjustments proposed by Staff |
| 20 | | should be rejected. |

| 1 | | D PERMIT AND RECORDING FEES |
|-----|----|--|
| 2 | Q. | DO YOU AGREE WITH STAFF'S PROPOSED OPERATING INCOME |
| 3 | | ADJUSTMENT NO. 15 ELIMINATING \$3,992 FOR PERMIT AND RECORDING |
| 4 | | FEES? |
| 5 | A. | I am in partial agreement with Staff's recommendation. My review of the actual test-year |
| 6 | | charges indicates that \$3,350 of the charges is for Sunrise's Annual Operating Permit |
| 7 | 5 | issued by Maricopa County Environmental Services Department. A copy of the Permit |
| 8 | | Renewal Invoice is attached as Exhibit RLJ-R2. The Annual Operating Permit is an |
| 9 | | operating expense and is properly included in test-year expenses. As noted by Staff, the |
| 10 | | remaining \$642 is more appropriately charged to capital. |
| l 1 | Q. | HOW DID YOU ACCOUNT FOR THE \$642 IN COST THAT SHOULD BE |
| 12 | | CAPITALIZED? |
| 13 | Α. | I added Income Statement Adjustment RLJ-21 (Page 25, Schedule C-2 Rebuttal) |
| 14 | | reducing test-year revenue by \$642. |
| 15 | | E PROPERTY TAXES |
| 16 | Q. | HAVE YOU REVIEWED STAFF'S PROPERTY TAX ADJUSTMENT? |
| 17 | A. | Yes, I have reviewed the adjustment. |
| 18 | Q. | DID STAFF MAKE ANY ADJUSTMENTS TO THE CALCULATION FACTORS |
| 19 | | PROPOSED BY SUNRISE? |
| 20 | A. | Yes. Staff made several changes to the factors proposed by Sunrise as described below. |
| 21 | | • Staff reduced the assessment ratio from 23.0% to 22.5%. |
| | II | |

| | Docke Rebut | se Water Company et No. W-02069A-08-0406 tal Testimony of Ray L. Jones 12 of 20 |
|----|----------------|---|
| 1 | | • Staff increased the CWIP factor from \$5,709 to \$20,865. |
| 2 | | • Staff increased the Book Value of Licensed Vehicles from \$0 to \$181,994. |
| 3 | | • Staff reduced the Composite Property Tax Rate from 10.0306% to 7.41614%. |
| 4 | Q. | DO YOU AGREE WITH STAFF'S CHANGES? |
| 5 | A. | I agree with Staff's assessment ratio of 22.5%, but I disagree with the other changes. |
| 6 | Q. | HAS STAFF INDICATED THEIR POSITION HAS CHANGED SINCE FILING |
| 7 | | DIRECT TESTIMONY? |
| 8 | A. | Yes. In its response to Sunrise's first set of data requests, Staff indicated that it now |
| 9 | | agrees that the book value of licensed vehicles is \$0 and that the composite tax rate is |
| 10 | | 10.0306%. |
| 11 | Q. | WHERE DID YOU OBTAIN YOUR CWIP FACTOR OF \$5,709? |
| 12 | A. | The factor is 10% of the CWIP balance shown on Line 5 of schedule E-1 for the test year. |
| 13 | Q. | HAVE YOU UPDATED YOUR PROPERTY TAX ADJUSTMENT RLJ-12 TO |
| 14 | <u>.</u> | REFLECT YOUR REBUTTAL POSITION? |
| 15 | A. | Yes. As indicated on page 16 of Schedule C-2 Rebuttal, Sunrise requests a property tax |
| 16 | : | expense of \$62,283. |
| 17 | | F INCOME TAX |
| 18 | Q. | WHAT IS STAFF'S RECOMMENDATION REGARDING INCOME TAX |
| 19 | | EXPENSE IN THIS CASE? |
| 20 | A. | Staff is recommending that income tax expense be excluded from the expenses of |
| 21 | | Sunrise. |

22

23

Q. WHY DOES STAFF MAKE THIS RECOMMENDATION?

A. Staff states that because Sunrise is exempt from corporate tax, Sunrise does not incur income tax expense as a cost of service.

Q. PLEASE COMMENT ON STAFF'S POSITION REGARDING INCOME TAX EXPENSE?

- A. I do not agree with Staff's position for the reasons outlined below.
 - The net income of Sunrise creates an income tax liability that is a direct result of providing water service and is appropriately recovered in rates.
 - The Commission has included income tax expense in the rates of Sunrise in past rate cases.
 - The Commission has included income tax expense in the rates of other Subchapter S
 corporations ("S-Corp"), Subchapter C corporations ("C-Corp"), and Limited
 Liability Companies ("LLC") that do not directly pay income tax.
 - Adoption of Staff's position will weaken Sunrise's financial condition and result in a
 decrease in the availability of funds for Sunrise to continue making needed
 improvements to its system.

Q. PLEASE DISCUSS WHY THE INCOME TAX LIABILITY CREATED BY SUNRISE SHOULD BE RECOVERED IN RATES.

A. It is not disputed that the net income generated by Sunrise through the provision of regulated water services is subject to State and Federal income tax. That tax liability would not exist absent the provision of regulated water services by Sunrise. Clearly the tax is an expense incurred in the provision of water service by Sunrise. Accordingly, like any other expense prudently incurred in the operation of a regulated entity, the income

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 14 of 20

tax expense should be recovered in rates of the regulated entity, unless circumstances particular to the regulated entity warrant a disallowance of the income tax expense.

Staff's position is based solely on the technicality that, as an S-Corp, Sunrise does not directly pay the income tax. Staff provides no other justification for denial of the expense. Staff's position to deny a real cost of providing service based on a generic technicality is flawed and should be rejected.

Q. WHAT DO YOU MEAN BY CIRCUMSTANCES PARTICULAR TO THE REGULATED ENTITY?

A. I am talking about the specific facts of a regulated utilities' case before the Commission. For example, in the case of a utility that has failed to reinvest a prudent level of earnings into plant and facilities, the Commission may determine that denying recovery of income tax expense is appropriate. Or, in the case of a utility that has a small or negative rate base, it may be appropriate to deny income tax recovery when establishing rates based on an operating margin. Absent these or other compelling circumstances the income tax expense should be an allowable expense in the rates of the utility.

Q. HOW HAS THE COMMISSION TREATED INCOME TAX EXPENSE IN PREVIOUS SUNRISE WATER CASES?

A. I have reviewed Sunrise's files for it two previous rate cases and determined that in both cases the Commission has approved rates that included the recovery of income tax expense.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 15 of 20

Q. ARE YOU AWARE OF THE COMMISSION APPROVING RECOVERY OF INCOME TAXES IN RATES FOR OTHER COMPANIES THAT DO NOT DIRECTLY PAY INCOME TAXES?

A. Yes I am.

First, there are numerous C-Corps that do not directly pay income taxes. Under Federal tax law and Arizona tax law, the parent company of a C-Corps has the option of including its subsidiary's income on the parent company's tax return. The tax return is commonly referred to as consolidated tax return. Under this scenario, the parent company, not the locally regulated C-Corp, pays the income tax. Numerous regulated C-Corps in Arizona file taxes on a consolidated basis. For these entities, the Commission routinely calculates income taxes as if the C-Corp filed taxes on a standalone basis and includes the pro forma income tax expense in the rates of those companies.

Second, as noted above, the Commission has authorized recovery of income taxes for Sunrise in previous cases and has more recently² approved income taxes in the rates of Camp Verde Water System, Inc., an S-Corp.

Third, I am aware of a very recent³ decision in the case of Wickenburg Ranch Water LLC where the Commission included income taxes in approved rates.

Q. If STAFF'S POSTION REGARDING INCOME TAXES IS ADOPTED, WHAT IMPACT WILL IT HAVE ON THE FINANCIAL CONDITION OF SUNRISE?

A. It will weaken Sunrise's financial condition. Sunrise's revenue and after-tax net income will decline. The decline will result in lower operating margins, lower debt coverage ratios, lower retained earnings, and lower returns on equity.

² See Decision No. 60105 dated March 19, 1997

³ See Decision No. 70741 dated February 12, 2009

19

20

21

A.

1 Q. WHAT WILL BE THE LONG-TERM RESULT OF THIS FINANCIAL 2 WEAKENING OF SUNRISE? 3 A. The loss of revenue will translate directly into a decrease in the availability of funds for 4 Sunrise to continue making prudent investments into maintaining and growing its water 5 system. Specifically, as explained by Mr. Collins, the loss of revenue will directly impact 6 7 availability of funds in the following three ways. Retained earnings available for capital improvements will be reduced dollar for dollar 8 9 by the reduction in revenue due to the disallowance of income tax expense. 10 The reduction in revenue will reduce cash flow thereby reducing debt coverage ratios, reducing the availability of debt financing from WIFA or other debt providers. 11 Since income taxes must be paid on the income generated by Sunrise, Mr. Campbell 12 13 will experience a significant reduction on the real return on equity for Sunrise. As with any business enterprise, a diminished return on equity for Sunrise will negatively 14 15 impact its ability to raise additional capital from its shareholder, Mr. Campbell. Q. MR. COLLINS MENTIONS THAT SUNRISE WILL EXPERIENCE 16 17 DIMINISHED REAL RETURN ON REAL EQUITY. HAVE YOU QUANTIFIED THIS REDUCTION? 18

Yes I have. Based on Sunrise's rebuttal case, excluding income tax from rates is the

equivalent of a 298 basis point reduction in the authorized return on equity. The

calculation is detailed in the table below.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 17 of 20

VIII RATE DESIGN

- Q. HAVE YOU REVIEWED THE RATE DESIGN PROPOSED BY STAFF?
- 3 A. Yes I have.

1

2

4

5

6

7

8

9

- Q. HOW HAS STAFF CHANGED THE RATE DESIGN COMPARED TO SUNRISES PROPOSED RATE DESIGN?
- A. Staff has made two changes to the rate design. First, Staff has increased the base charges to yield higher revenues from monthly minimum charges. Second, Staff has changed the break-over points for the ³/₄" meter size. Specifically, the break-over point between the second and third tier has been decreased from 18,000-gallons to 13,000-gallons.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 18 of 20

Q. DO YOU AGREE WITH THESE CHANGES?

- A. I agree with Staff that Sunrise's proposed rate design did not generate sufficient revenue from the monthly minimum charges. However, I disagree with Staff's change to the break-over point for ¾" meters.
- Q. HAVE YOU ADOPTED STAFF'S RECOMMENDED BASE CHARGES IN SUNRISE'S REBUTTAL POSITION?
- A. Yes, I have adopted Staff's recommended base charges.
 - Q. WHY DO YOU DISAGREE WITH STAFF REGARDING THE CHANGE IN THE BREAK-OVER POINT FOR THE ¾" METER SIZE?
 - A. I propose a break-over point between tier 2 and tier 3 of 18,000-gallons. This break-over point was selected to coincide with the average usage of the ¾" residential class. I believe it is generally appropriate that tier three billing rates begin when usage exceeds the average for the meter size, and I have adopted this methodology to set the break-over points for meter sizes through 1.5-inch diameter. As noted in my direct testimony, I adopted a break-over point for the two-inch meter below the average usage to encourage additional water conservation by Sunrise's largest water users.
 - Q. WHAT IS SUNRISE'S REBUTTAL POSITION REGARDING THE BREAK-OVER POINT FOR THE ¾" METER SIZE?
 - A. Sunrise continues to propose a break-over point between tier 2 and tier 3 of 18,000-gallons for the ¾" meter size. Sunrise believes that establishing the break-over point at the average usage for the ¾" meter sends proper conservation price signals to Sunrise customers without placing undue burden on below average usage.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 19 of 20

Q. WHAT IS YOU POSITION REGARDING STAFF'S PROPOSED SERVICE CHARGES?

A. Staff's service charges for several items are slightly lower than those proposed by Sunrise. Sunrise proposed service charges that are consistent⁴, with those approved by the Commission on August 29, 2006, in Decision 68925 for Sunrise's sister company West End Water Co. Sunrise requests that Staff adopt Sunrise's proposed service charges so that Sunrise's service charges will be the same as those for West End Water Co. This will provide administrative convenience for the common customer service staff serving the two companies.

Q. WHAT IS SUNRISE'S POSITION REGARDING STAFF'S PROPOSED SERVICE LINE AND METER INSTALLATION CHARGES?

A. The charges proposed by Staff are acceptable to Sunrise. However, Staff has included a cost for installation of a 5/8" x 3/4" meter and service line. Due to the large lot size throughout Sunrise's service area, Sunrise does not offer the 5/8" x 3/4" meter size as a service option. Sunrise requests that Staff eliminate the 5/8" x 3/4" meter size from its recommendation.

Q. HAVE YOU PREPARED A SCHEDULE DETAILING SUNRISE'S REBUTTAL RATE DESIGN?

A. Yes, Schedule H-3 Rebuttal provides Sunrise's proposed rate design.

⁴ The NSF Check charge and Meter Re-Read charge proposed in Sunrise's direct testimony were mistakenly inconsistent with the West End Water Co. charge. Sunrise has corrected this error in its Schedule H-3 Rebuttal.

Sunrise Water Company Docket No. W-02069A-08-0406 Rebuttal Testimony of Ray L. Jones Page 20 of 20

1 Q. WHAT IS THE IMPACT OF SUNRISE'S RATE DESIGN ON A TYPICAL 2 RESIDENTIAL CUSTOMER?

A. Sunrise's rebuttal rate design increases the monthly bill for a ³/₄" metered residential customer, with an average consumption of 17,782 gallons, from \$62.68 to \$65.31, an increase of \$2.63 or 4.20%.

Q. DOES THIS CONCLUDE YOUR TESTIMONY?

A. Yes, it does.

Adjust Plant In Service Balance to Conform With Decision No. 53721

Line <u>No.</u>

Commission Decision No. 53721 dated August 31, 1983 established the Original Cost of Plant In Service less Depreciation to be \$494,038. The finding is based on the Staff Report dated July 31, 1982 in Docket number U-2069-83-042. In the Staff Report, the Original Cost of Plant In Service was \$571,139. Sunrise Water Co. did not adjust its Plant in Service Balance to conform to the Commission finding in Decision No. 53721. This adjustment conforms the July 31, 1982 Plant in Service balance to the Commission finding in Decision No. 53721.

| <u>No.</u> | | | | | | | | |
| 1 | Adjust Metered Water Revenue to Reflect Normalized Level of Hydrant Meter Sales | | | | | | | |
| 2 | | | | | | | | |
| 3 | Sunrise Water Co. makes water available from fire hydrants in its service area to contractors | | | | | | | |
| 4 | performing construction within its service area. Hydrant meter sales for the Test Year are | | | | | | | |
| 5 | significantly above normal levels due to elevated levels of subdivision construction associated with | | | | | | | |
| 6 | high levels of real estate development in 2006 - 2007 and a single large flood control project under | | | | | | | |
| 7 | construction during 2007. Normalized hydrant meter sales should be used to avoid inclusion of | | | | | | | |
| 8 | nonrecurring revenue in the Test Year | | | | | | | |
| 9 | | | | | | | | |
| 10 | Hydrant Meter Sales (gallons): | | | | | | | |

¹ Apparent Arizona Tax Rate is the change in State tax due divided by the change in Arizona Taxable Income

² Apparent Federal Tax Rate is the change in Federal tax due divided by the change in Federal Taxable Income

³ Calculation of Apparent Tax Rates is necessary to correctly calculate Gross Revenue Conversion Factor when Test Year Taxable Income is less than zero and is taxed at a rate of zero or when increased income is taxed at different marginal tax rates.

PERMIT TYPE:

WATER PUBLIC/COMMUNITY

1,001 - 10,000 POPULATION

PERMIT: 07070 EXPIRATION: 12/31/07

FEE: \$3350.00

BALANCE DUE: \$3350.00

TOTAL: \$3350.00

Pursuant to Maricopa County Health Code, Chapter 1, Regulation 5a, this is an invoice for your permit renewal fee. Please sign and return this invoice with your remittance prior to December 31, 2007. A \$30.00 delinquency fee becomes due if payment is not received within one calendar month of the due date, pursuant to Regulation 4g(3). No permit is valid until payment is made in full.

This fee was based on a flat fee amount of \$2000.00 and a per well rate of \$270.00 and a per plant rate of \$1350.00.

No permit is transferable from person-to-person or place-to-place and enforcement action may be taken for operating without a valid permit, Regulation 4h. If you have questions regarding the Health Code or the inspection, please call (602) 506-6668.

Make check payable to Maricopa County Environmental Services Department or MCESD. If you have a billing question or a mailing address change please call (602) 506-6616 or fill out an Administrative Change Request form at www. Maricopa.gov/envsvc.

IF YOU ARE A NEW OWNER, THIS APPLICATION IS INVALID AND YOU SHOULD NOT PAY THIS INVOICE.

I/We assume complete responsibility for the business to be conducted at the premises for which I/we are making application for an operating permit.

I/We certify that the establishment will be operated in full compliance with all applicable environmental regulations duly adopted and all other Local. County, and State rules, Ordinances and Regulations pertaining thereto. I/We understand that I/We are responsible for knowing the contents of the applicable regulations as they pertain to said business.
